(54) HAIR COSMETIC SHEET

(57) Abstract:

PURPOSE: To obtain a hair cosmetic sheet exhibiting excellent stability against heat and light over a long period and having extremely excellent portability, by drying and forming a thin film of a hair cosmetic composition containing a film-forming water-soluble polymer.

CONSTITUTION: A hair cosmetic composition containing one or more film-forming water-soluble poly-

mers preferably selected from natural polymers, cellulose derivatives, vinyl or vinylidene polymers and cationic polymers is dried and converted into a thin film to obtain the objective hair cosmetic sheet preferably having a thickness of 0.01W5mm and a size of 2cm×3cmW6cm×15cm and having a laminated form or a form sandwiched between the above water-soluble polymer layers. The cosmetic is stable against heat and light and has excellent portability because of its non-bulkiness and packageability into a light-weight package. It can accelerate the drying of hair when applied to shampooed hair.
